

All of Temescal's therapeutic cannabis is cultivated with the upmost care in Manchester, New Hampshire, using strict quality control and quality assurance measures. While the United States Department of Agriculture does not currently have a program in place to certify cannabis as "Organic," Temescal's cultivation team uses products and techniques that closely mimic what an organic farm would utilize.

Highlights of our pharmaceutical grade cannabis cultivation include:

- ✓ Using **only organic nutrients**
- ✓ Cultivating in **fully climate controlled, contaminant free environment**
- ✓ If necessary, using **limited amounts** of organic pesticides
- ✓ **Testing all cannabis and cannabis concentrate products** for contaminants and cannabinoid profiles at an independent testing laboratory
- ✓ Processing cannabis in a **sterile, laboratory-like environment**

► *We are proud to offer qualifying patients of New Hampshire the **highest quality** cannabis and cannabis products possible – please contact us with any specific questions regarding our offerings.*
